Digamber Capfin Limited has implemented a waste segregation process, wherein waste is segregated appropriately, measured, and systematically recorded for monitoring and effective waste management.

Before

After

Various measures, including awareness programs highlighting the importance of waste segregation and initiatives to promote waste reduction, are being undertaken. The waste-related data are being analyzed to identify key areas for improvement and appropriate actions are taken.

The Head Office of the company has adopted the less plastic use approach and accordingly none of the employees are using any plastic bottles. From the Board Room to the work stations the reuseable non plastic bottles are being placed.

The company has adopted zero polythene policy and none of the employees are allowed to use polythene in the office premises. The company is committed to maintain the zero-polythene status in all of its offices.

SMALL CHOICES. LESS PLASTIC.
A GREENER WORKPLACE.

Plastic stays in the environment for years. A few simple habits at work can reduce waste every single day.

1 Carry a reusable water bottle

Choose steel, glass or another durable non-plastic bottle instead of single-use plastic.

2 Bring your own cup or mug

Avoid disposable cups. Keep a reusable mug at your desk for tea and coffee.

3 Pack lunch in reusable containers

Prefer steel, glass or other durable containers over disposable plastic boxes.

4 Say no to disposable straws & cutlery

Use reusable spoons, forks and other cutlery. Skip plastic straws whenever possible.

5 Carry tea in a kettle or thermos

Use a thermos, flask or thermosteel bottle instead of disposable or single-use containers.

6 Choose paper or low-plastic packaging

Where practical, prefer food products with paper-based or minimal plastic packaging.

REFUSE what you do not need • **REUSE** what you can • **REDUCE** what you consume

Every reusable choice counts. Make plastic reduction a daily office habit.
